Your 1-Page Plan

Vizdale Full-Stack Developer Internship

Your Name	Eswaraprasadh A
Project	MemberPass
Client	Thendral Yoga Loft, Coimbatore
Who will use it?	Yoga and fitness members, along with front-desk staff.
Your How Might We, in your own words	How might we simplify the membership experience by providing a digital platform where members can easily access their benefits, manage subscriptions, and complete entry verification without manual effort?
Your tool in one sentence	A smart membership management platform that allows users to explore membership plans, register online, manage digital passes, and enables staff to verify member access through a secure QR code system.

#	5 things a user can do
1	Register as a new member and access the platform using secure login credentials.
2	View membership categories and check the benefits offered under each plan.
3	Purchase a membership by selecting a suitable package and completing the payment process.
4	View membership history, check renewal dates, and download the digital membership card.
5	Allow staff to validate membership details by scanning the QR code before granting access.

Your AI feature	Own AI Feature
Main screens	Member: Register/Login, Membership Plans, Payment, My QR Pass and Pause Request. Staff: QR Scanner, Member Status and Attendance Overview.
Made-up data you will use	Use 30 fictional member accounts with different membership categories, subscription periods, payment histories, renewal dates, QR codes, and access records. Include sample successful and failed transactions for testing the application.
What worries you most?	Ensuring secure member information, preventing unauthorized QR code usage, maintaining accurate payment records, and handling membership renewals without errors.
