Your 1-Page Plan

Vizdale Full-Stack Developer Internship

Your Name	Swetha K
Project	MemberPass
Client	Thendral Yoga Loft, Coimbatore
Who will use it?	Yoga and fitness members, along with front-desk staff.
Your How Might We, in your own words	How might we make membership services easier by letting members manage their plans and digital passes online, while helping staff verify entry and track attendance quickly?
Your tool in one sentence	A membership web application where users can register, choose a plan, make a test payment and access a QR pass, while staff can scan the pass to validate entry.

#	5 things a user can do
1	Create an account and securely sign in to the MemberPass application.
2	Explore the available membership plans and compare their features.
3	Choose a plan, complete registration and activate a digital membership.
4	Open the QR membership pass to check plan details and expiry, or request a plan pause.
5	Scan a member's QR pass and view whether entry is allowed, along with the validation reason.

Your AI feature	Own AI Feature
Main screens	Member: Register/Login, Membership Plans, Payment, My QR Pass and Pause Request. Staff: QR Scanner, Member Status and Attendance Overview.
Made-up data you will use	20 sample member profiles with different membership statuses; Basic, Unlimited and Quarterly plans; test payment records, QR codes, attendance entries and sample webhook events. All data will be fictional.
What worries you most?	Making sure payment confirmations are genuine, duplicate webhook messages are handled safely, and the QR scanner checks the latest membership status and access rules before allowing entry.
